# Quickrail Roof Railing System

The advanced perimeter railing system for any Building with flat roofs and with access to these roofs.

Quickrail is specifically designed to give immediate regulation compliant perimeter railing and edge protection for accessible roof spaces.

- Protects the integrity of the roof membrane as no drilling and fixings are required.
- Quick and easy to install.
- Mounted on rubber to avoid any contact with the roof.
- Permanent or temporary application.
- Aesthetically pleasing.
- Galvanised finish.
- Immediate safety solution.
- The base legs are not too big to become a trip hazard.

Due to its unique prefabricated components and its easy assembly, the Quickrail System also offers clear costs benefits over other systems..... Please call us for further details.
